MANAGE FOR UNCERTAINTY

Experience has been developed in a constantly changing business environment:

- **2008: Integration of the Italian and British subsidiaries of Finmeccanica in Defence Electronics into a large, single transnational entity (UK BA exposure);**
- **2013: Consolidation of all group companies in the Defence & Security sector, to create Selex ES (more than 17,000 employees worldwide);**
- **2015: Restructuring of total A&D sector.**

In the meantime, business is changing worldwide and new challenges are emerging.
